Drill String And Collars 1

Drill String and Drill Collars This publication is Lesson 3 of Unit 1 of the Rotary Drilling Series (RDS) In rotary drilling, a crew rotates a bit that drills a hole through the earth in search of oil or gas. The crew attaches the bit to a hollow length of pipe that serves two purposes: it provides the weight to make the bit dig into the earth's formations, and it provides a passageway to ...

The IADC definition of a drill string is drillpipe with tool joints attached. Drill stem is all those members between the swivel and the bit, and it includes drill string, kelly or top drive, subs, drill collars, heavy weight drillpipe, stabilizers, shock absorbers, reamers and any other in-hole equipment used generally or part-time during drilling operations. API/ISO specifications In the ...

A modern drill collar is about 30 ft long, and the total length of the string of drill collars may range from about 100 to 700 ft or longer. The purpose of drill collars is to furnish weight to the bit. However, the size and length of drill collars have an effect on bit performance, hole deviation, and drill pipe service life. Drill collars may be classified according to the shape of their cross ...

Drill collars are trepanned and drilled to API Spec. 7-1. Full-length heat-treatment processes ensure mechanical properties meet or exceed API Spec. 7-1 requirements. A hardness range of 285-341 Brinell hardness and Charpy "V" notch minimum impact strength of 40 ft-lb at 70 °F are guaranteed 1 in. below the surface.

Definition - What does Drill Collar mean? A Drill Collar is a tubular piece of a drill string which provides weight on the bit for the purpose of drilling. While drill pipes make up the majority length of drill strings, drill collars make only a small amount. They have thick walls machined from the solid bars of steel.

Keystone Drill Collar Slips KET Type A, C-1, and DCS Drill Collar Slips are designed for use while running drill collars. The slip's multi-segment-hinged design allows it to fit all drill collars within the slip's size range. These drill collar slips are manufactured from heat-treated alloy steel, increasing strength and resistance to wear.

A drill string on a drilling rig is a column, or string, of drill pipe that transmits drilling fluid (via the mud pumps) and torque (via the kelly drive or top drive) to the drill bit. The term is loosely applied to the assembled collection of the drill pipe, drill collars, tools and drill bit.

Drill string - Wikipedia

In deck structures of offshore platforms, drill-collars (pipes) must be handled by crane, and it has been reported that such drill-collars often drop accidentally to the deck plate. Figure 9.6 shows a schematic of a drill-collar pipe. For typical dimensions used for the work in offshore platforms, L = 2000 mm, d 1 = 241.3 mm, and d 2 = 76.2 mm. The weight of a drill-collar made of high tensile ...
