IEC 61400-12-2:2013 specifies a procedure for verifying the power performance characteristics of a single electricity-producing, horizontal axis wind turbine, which is not considered to be a small wind turbine per IEC 61400-2.

IEC TR 61400-12-4:2020 summarizes the current state of the art in numerical flow modelling, existing guidelines and past benchmarking experience in numerical model validation and verification. Based on the work undertaken, the document identifies the important technical aspects for using flow simulation over terrain for wind application as well as the existing open issues including ...

Power performance measurements according to the international guidelines IEC 61400-12-1 Edition 2 (2017) This two day course allows attendees to benefit from DNV GL's extensive experience in power curve measurements according to the international guideline IEC 61400-12-1 Ed.1 with a focus on the changes included in Ed.2 (2017).

Wind Turbine Power Performance IEC 61400-12-1 - DNV GL

The 61400 is a set of design requirements made to ensure that wind turbines are

appropriately engineered against damage from hazards within the planned lifetime. The standard concerns most aspects of the turbine life from site conditions before construction, to turbine components being tested, assembled and operated.

IEC 61400 - Wikipedia

IEC 61400-12-1:2017 specifies a procedure for measuring the power performance characteristics of a single wind turbine and applies to the testing of wind turbines of all types and sizes connected to the electrical power network.

IEC 61400-12-1:2017 | IEC Webstore

For power curve extrapolation, WasP 12 offers to use either the IEC extrapolation method (as described in the international standard IEC 61400-12-1) or the Svenningsen extrapolation method (adjusted IEC extrapolation method, improved to match turbine control). More information about the Svenningsen extrapolation method can be found in the abstract/poster "Proposal of an Improved Power Curve ...

WasP 12 released - WasP

International Standard IEC 61400-12-2 has been prepared by IEC technical committee 88: Wind turbines. The text of this standard is based on the following documents: FDIS Report on voting 88/442/FDIS 88/445/RVD Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table. This publication has been drafted in accordance with ...
