The development of American medical education involved a conceptual revolution in how medical students should be taught. With the introduction of laboratory and hospital work, students were expected to be active participants in their learning process, and the new goal of medical training was to foster critical thinking rather than the memorization of facts. In Learning to Heal, Kenneth Ludmerer offers the definitive account of the rise of the modern medical school and the shaping of ...

Learning to Heal: The Development of American Medical ...

Learning to Heal. Learning to Heal describes the development of America's modern system of medical education, a process that began after the Civil War and culminated in the 1920s. This chronology is important to understand because initiative for and guidance of the movement came from visionary, committed leaders within academic medicine and the medical profession at large who were striving to improve medical education decades before the famed Flexner report of 1910. At the root of this ...

Learning to Heal: The Development of American Medical ...

Learning to Heal is the best description I have read on the development of US medical schools, and it's an informative reminder to all US medical graduates of where their education came from. The Lancet Kenneth Ludmerer's excellent book tells the fascinating story of how the United States achieved its world leadership in medical education...

This book is an account of the rise of the modern medical school and the shaping of the medical profession.

Learning to Heal: The Development of American Medical ...

Service-learning opportunities for medical students are becoming more common; as mentioned, the LCME now mandates that they be made available for students who wish to experience them. MSM's CHC differs from most of these in that it is required of all first-year students (rather than offered as an elective) and thus introduces all students, including those who would not have pursued it ...
