In later years, however, even commercial microtrons are produced, having two main practical applications: the radiography of heavy steel constructions and, above all, the radiation therapy of cancer [ 12] . It is believed that cancer treatment will be the main application of circular nucrotrons in the future. 3. Racetrack microtrons While the circular microtron was developing fairly rapidly, the racetrack version (see fig. 5) showed much slower progress. As early as 1945 Schwmgger ...
