New Zealand pasture and crop science (Book, 1999 ...

Both native and introduced arthropod pests inhabit and cause damage to pasture and forage crops in New Zealand. A critical period for protection of pasture and forage crops is during seedling establishment, and a range of soil-dwelling and rapid-invader species can cause significant seedling damage and loss. Established crop and pasture plants are also vulnerable to attack by arthropods, as are

CiNii [] - New Zealand pasture and crop science

It is impossible to say which is New Zealand's worst pastoral weed. But in terms of lost production, land covered and money spent on control, it's easy to argue that gorse is the worst. Scrub weeds like gorse, broom and others waste useful pasture space. But gorse can also be an excellent nursery for native seedlings.

Weeds in pasture, crops and forestry - Te Ara Encyclopedia ...
