Summary This chapter contains sections titled: Introduction Late Precambrian Paleozoic Early Mesozoic Late Mesozoic-Early Cenozoic Laramide Orogeny Middle Cenozoic Late Cenozoic Summary

### **A Tectonic History of Trans-Pecos Texas - Muehlberger ...**

While most of the state is quite flat and less than 2500 feet above sea level, the Trans-Pecos area experienced the Laramide Orogeny--resulting in Basin and Range topography--as well as extensive Tertiary volcanism and faulting. These events elevated the basins to about 4000 feet above sea level with mountain ranges that jut up 2000 to 3000 additional feet. The hydrology of the region is also of interest since most of it is characterized by internal drainage, that is, when most of ...

### **Trans-Pecos and Big Bend - Geosciences - LibGuides at ...**

The map emphasizes structures formed during late Tertiary Basin-and-Range extension, mid-Tertiary volcanism, and early Tertiary Laramide folding. It also shows structures resulting from late Paleozoic and Precambrian deformation. The accompanying text, "Summary of the Tectonic Development of Trans-Pecos Texas," traces the tectonic history of the area, which has undergone repeated deformation from the Precambrian to Recent.

### **Field Trip Guidebook, 1985. Structure and Tectonics of ...**

The Hueco bolson of Trans-Pecos Texas formed in response to Cenozoic extensional tectonism and lies within the southern Rio Grande rift near the poorly defined boundary between the rift and the southern Basin and Range province. The bolson is composed of a northwest subbasin that contains north-striking normal faults and a southeast subbasin that contains northwest-striking normal faults. Cenozoic basin fill is thin (less than 150 to 200 m) on the east and northeast bolson margins and is ...

### **Tertiary and Quaternary tectonics of the Hueco bolson ...**

extensional tectonics, resulting in Basin and Range structures and related mountain ranges in the Trans-Pecos. Between these ranges, which include the Franklin, Hueco, Guadalupe, Delaware, Sierra Diablo, Sierra Vieja, and Van Horn mountains, large basins formed that filled with thick sequences of gravel and sand eroded from the adjacent mountains. It is in this setting that we presently reside ...
